

## How to Install the Hyperion IR Web Client

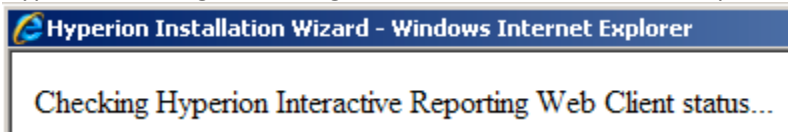

Please follow the procedure below to install the Hyperion IR Web Client.

**Important Note:** UITS supports the use of Internet Explorer 7 with Hyperion software. The use of other browsers such as Internet Explorer 8 and Firefox is not supported and not recommended.

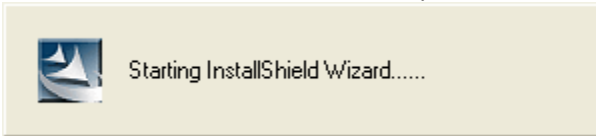

1. Log in to the Hyperion Workspace.
2. Select **Tools | Install | Interactive Reporting Web Client**

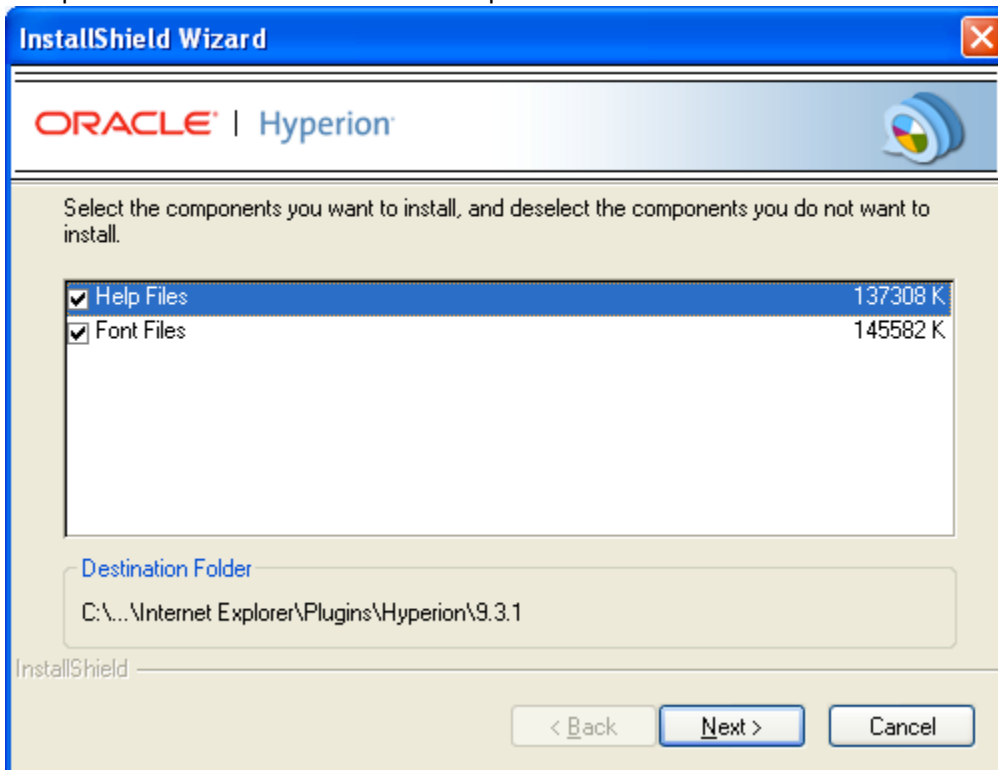

3. Hyperion will begin checking the status of the Interactive Reporting Web Client.
4. Hyperion will begin checking the status of the Interactive Reporting Web Client.

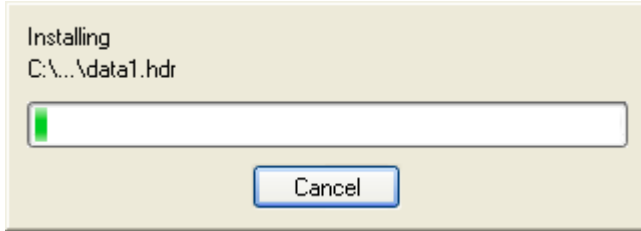

5. The InstallShield Wizard will start up.

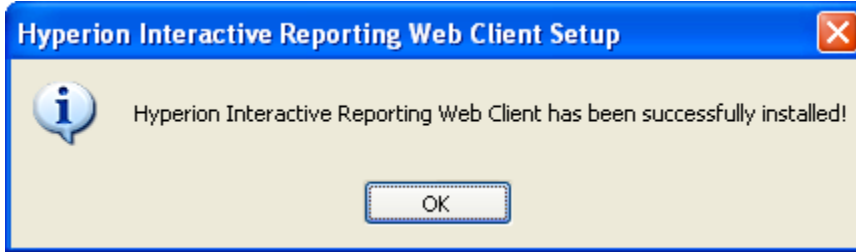

6. Accept the default InstallShield Wizard options. Select the Next button.

7. The Hyperion IR Web Client installation will begin.

8. A message will be displayed once the IR Web Client has been successfully installed. Select the **OK** button.

9. You will be returned to the Workspace.
